Portfolio: <https://methreamarnath.vercel.app>

Web Developer with skills in HTML, CSS, JavaScript, React.js, Node.js, Express.js, and MongoDB. Experienced in building responsive and user-friendly full-stack web applications and integrating APIs. Passionate about creating efficient, scalable solutions and continuously improving development skills.

Skills

Frontend: React.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS

Backend: Node.js, Express.js, MongoDB, REST API Development

Database: Oracle SQL(Basic), MongoDB

Tools: Git, GitHub

Experience

Frontend Developer Intern, Upnyx – AIWorkSquad.com

Sep 2025 – Dec2025

- Built responsive UI components using React.js and Tailwind CSS for creating and managing social media posts in an AI-powered automation platform.
- Developed multiple social media post editor interfaces based on product requirements and deployed them to production.
Implemented an overlay editing system that allows users to stay in a chat window while editing post content simultaneously.

Projects

JobDekho API

- Built a RESTful job management API using Node.js, Express.js, and MongoDB.
- Implemented JWT authentication and authorization for secure user access.
- Designed CRUD endpoints for job postings with proper middleware, error handling, and API structure.

Instagram Clone (Full-Stack Project)

- Built a full-stack Instagram clone using React.js, Node.js, Express.js, and MongoDB with core social media functionality.
- Implemented JWT-based authentication and authorization with features like user profiles, post creation, follow/unfollow, and post likes.
- Integrated Multer for file uploads and ImageKit for image/media storage to support content sharing and media management.

Figma Clone (Frontend Project)

- Built a basic Figma-style design editor using HTML, CSS, and JavaScript, enabling users to create and edit shapes in a workspace.
- Implemented features like shape selection, resizing, dragging, layer management, and property editing using DOM manipulation.
- Developed a properties panel for position, size and rotation updates to simulate a simplified interface.
